1. Technical specifications

Rated power supply: 110-240V

Dimensions: 115 x 80 x 205cm

Weight: 200KG

Power consumption: 70W

2. Terms of use

The machine is powered with 230V/50Hz current. Always make sure the machine is unplugged before you do any maintenance. Only authorized staff may carry out any work on the machine. Under no circumstances should any plug or connector be pulled out or disconnected when the power is on. Make sure the plug and socket are properly grounded. Protect the mains cable against any damage. Oil and acid can damage the cable. Use proper extension cables and do not overload power sockets. Use only original spare parts.

3. Safety Precautions

High voltage can cause electric shock

Some parts may cause scalding

DO NOT put the machine on places uneven, sloping and easily be shaken.

Check wires and cables regularly.

Protect wires from damage by rats.

DO Not put the machine under the direct sunlight, it will damage the inside parts.
